Exposure

The Exposure domain model records the details of a subject's exposure to protocol-specified study treatment. Study treatment may be any intervention that is prospectively defined as a test material within a study, and is typically but not always supplied to the subject.

Variables	Data Type	Question	Code List	Validation
exyn	radio	Is treatment data available?	ny	
exstdat	text	What was the treatment start date?		date_dmy
exsttim	text	What was the treatment start time?		time
exrefid	text	What is the treatment label identifier?		
exendat	text	What was the treatment end date?		date_dmy
exentim	text	What was the treatment end time?		time
epoch	dropdown	To which period of the trial does this exposure refer?	epoch	
exdstxt	text	What was the dose per administration? (text)		
exdose	text	What was the dose per administration? (numeric)		number
exdosu	dropdown	What were the units for the dose?	exdosu	
exfast	radio	Fasting Status	ny	
exlot	text	What was the lot number of the study treatment used?		
extrt	text	Study Treatment Name		
exdosadj	radio	Was the dose adjusted from planned?	ny	
exadj	notes	What was the reason the dose was adjusted?		
exdosfrq	dropdown	What was the frequency of study treatment dosing?	exdosfrq	autocomplete
exroute	dropdown	What was the route of administration for the study treatment?	exroute	autocomplete
