

Slider

Visual analogue scale coded as values 0–100. You may provide labels above the left, middle, and right sides of the slider.

The image shows a software interface for a slider. At the top left, there are icons for editing (pencil), copying (two documents), pasting (document with plus), and deleting (red X), followed by the text "Variable: slider". Below this, the word "Slider" is displayed in bold. The main area features a horizontal slider bar with a blue square handle positioned at the 50 mark. The scale is labeled with "0" at the left end, "50" at the handle, and "100" at the right end. Below the slider bar, the text "Change the slider above to set a response" is written in red. To the right of the slider bar is a small white square input field. In the bottom right corner, there is a blue "reset" button.
