

Yes No

Radio buttons with the options "True" and "False." These values are automatically coded: "True" = 1, "False" = 0.

The screenshot shows a Jupyter Notebook cell with a toolbar at the top containing icons for edit, copy, paste, add, stop, and delete, followed by the text "Variable: true_false". Below the toolbar, the text "True False" is displayed on the left. To the right of this text are two radio buttons: the top one is labeled "True" and the bottom one is labeled "False". In the bottom right corner of the cell, there is a blue "reset" button.
